- **Types of Water Resource Problems and Opportunities**
  - Navigation
  - Flood Damage Reduction
  - Ecosystem Restoration
  - Water Supply
  - Water Quality Control

US Army Corps  
of Engineers  
Chicago District

# Programs:

## Ways the Corps can Help

### ■ Specifically Authorized Projects

- Congress provides the Corps a first authorization to accomplish the feasibility study and a second, separate authorization to construct the project.
- No Federal cost limitations

### ■ Continuing Authorities Program (CAP) Projects

- Congress provided the Corps with authorities to study and construct projects.
- Specific Federal cost limitations.
- Can save development and approval time, and can permit quicker response time.

### ■ Both types of projects require local sponsor to share total project costs
